Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 7-12, and 24 drawn to a method and system for providing image data /information products to customer, classified in class 382, subclass 305.
 - II. Claims 13-17 drawn to the system to generate a graphical user interface, classified in class 715, and subclass 700.
 - III. Claims 18-23 drawn to an exemplary system include a delivery unit, a network, and data management, classified in class 707, subclass 8.

Inventions are related as combination/subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instance case, the combination I as claimed does not require the particular of the subcombination as claimed, because I does not require the graphical user interface.

Art Unit: 2624

The subcombination has separate utility such as the requirement of the graphical user interface.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
